

## ● INFORMATION SECURITY MANAGEMENT SYSTEM

# ISO 27001 Compliance for Growing Businesses

A streamlined and scalable approach to achieving and maintaining ISO 27001 compliance through continuous monitoring, automated workflows, and centralized visibility — without overwhelming lean teams with spreadsheets, manual evidence collection, or reactive audit preparation.

## OVERVIEW

### What is ISO 27001?

ISO/IEC 27001 is the global benchmark for implementing an Information Security Management System (ISMS), establishing a structured framework of policies, procedures, and controls to systematically protect corporate data assets.

It is required for any business that processes sensitive client data, acts as a critical vendor, or needs to demonstrate an ironclad security posture to the market. For mid-market organizations, this framework is specifically utilized by Chief Information Security Officers (CISOs), compliance directors, and IT leads managing multi-departmental operations, global offices, and sprawling cloud architectures. They require this standard to replace broken manual processes, bridge cross-functional visibility gaps between engineering, HR, and procurement, and continuously monitor the 93 ISO security controls across complex systems. By governing this standard, mid-market enterprises eliminate operational silos, maintain year-round audit readiness, and confidently clear the complex security hurdles required to win high-value, upmarket enterprise contracts.

## THE CHALLENGE

### Implementation Realities

SMBs often struggle to balance ISO 27001 implementation with practical day-to-day operations. Managing risks, assets, access controls, incidents, vendors, policies, and business continuity manually can quickly overwhelm lean teams. Rapid infrastructure growth, SaaS expansion, and shadow IT also make asset visibility and control management difficult. In addition, continuous risk updates, evidence collection, audits, and year-round compliance monitoring create significant operational overhead even after certification.

# Move from reactive audit preparation to continuous ISO 27001 Compliance

## OUR APPROACH

### How Calvant solves it

Calvant replaces manual and reactive ISO 27001 management with a centralized, automated compliance ecosystem, giving growing teams continuous visibility into risks, controls, assets, and audit readiness without slowing business operations.

Step	Focus Area	How Calvant helps you
1	<b>Deploying a Ready-to-Use, Consultant-Free ISMS Framework</b>	Calvant provides pre-built ISO 27001 workflows, policies, and control mappings designed for lean and growing teams, reducing dependency on lengthy external consulting engagements.
2	<b>Mapping Infrastructure Automatically with Live Asset Discovery</b>	The platform continuously discovers and maps cloud assets, systems, and infrastructure changes in real time, ensuring visibility across the entire compliance environment.
3	<b>Streamlining Proof via Automated Evidence Gathering</b>	Calvant automatically collects logs, configurations, training records, and audit evidence directly from integrated systems through API-driven automation.
4	<b>Securing Operations Day-to-Day with 24/7 Control Monitoring</b>	Continuous background monitoring validates that controls remain operational at all times, while instant alerts help teams remediate gaps before audits or incidents occur.
5	<b>Keeping Pace with Fast-Moving Risks through an Active Risk Register</b>	A dynamic, continuously updated Risk Register correlates live infrastructure, vendor, and operational data to provide real-time visibility into evolving risks and compliance posture.

## The compliance partner built for modern businesses

Calvant is a unified digital compliance automation and governance platform designed to help growing organisations simplify and streamline their security, privacy, and compliance journey. With intelligent workflows, centralised documentation, automated evidence collection, and continuous compliance tracking, Calvant enables businesses to reduce manual effort, optimise time, and save cost.

Whether your organisation is working towards ISO 27001, ISO 27701, SOC 2, ISO 42001, GDPR, or other compliance frameworks, Calvant provides a scalable, structured approach to manage controls, risks, audits, policies, and compliance activities efficiently. Built for modern teams moving away from scattered spreadsheets toward a unified, automated compliance ecosystem.

## Decade-Tested Compliance Intelligence, Productised Platform

## What You Gain with Calvant

- Centralized Compliance Management
- Achieve More with Lean Teams
- Faster Audits - Reduced Manual Effort
- Real-Time Compliance Visibility
- Seamless Security Stack Integration

### Book a 1:1 Demo

- 1 Talk to experts coming from a consulting and audit background
- 2 Understand your business requirements, current gaps, and compliance priorities
- 3 Learn how others achieved compliance and audit success with Calvant
- 4 Discuss implementation timelines, audit readiness, and certification planning
- 5 Explore a practical roadmap to reduce manual effort, save time, and optimise compliance costs

“ ISO 27001 compliance becomes sustainable when security, risk, assets, and evidence are managed continuously — not just manually. ”
